

## Templeton Global Bond VIP Fund

### Templeton Global Bond VIP Fund

Information as of 09/30/2025

#### Description:

The fund seeks high current income, consistent with preservation of capital, with capital appreciation as a secondary consideration. The fund normally invests at least 80% of its net assets in bonds, which include debt securities of any maturity, such as bonds, notes, bills and debentures. This is a moderate to moderately aggressive investment.

Geographic	Percent of total holdings	Currency	Percent of total holdings

FRANKLIN TEMPLETON  
INVESTMENTS

**Horace Mann**  
Founded by Educators for Educators

**Beta:** -Class 1: 1.36 (3 year) -Class 4: 1.35 (3 year)

**Beta definition:**

Beta provides a measure of a stock or fund's volatility relative to the market. The market is often defined by a certain benchmark, index or market average. The market's beta is 1. If a stock or fund is more volatile than the market, its beta will be higher than 1. If it is less volatile, the beta will be below 1. An investment that has a beta of 1.25 is believed to be more volatile than its market benchmark. For example, if the benchmark dropped 1 percent, then an investment with a beta of 1.25 is predicted to drop 1.25 percent. Remember, investment returns and principal value will fluctuate, so the value of your account, when redeemed, may be more or less than your original cost.

**Benchmark:** JPMorgan Government Bond Index – Global

**Portfolio Manager**

Michael Hasenstab Ph. D.

Sonal Desai, Ph. D.

**What are the risks?**

Because the fund invests in bonds and other debt obligations, its share price and yield will be affected by interest rate movements. Bond prices generally move in the opposite direction of interest rates. Thus, as the prices of bonds in the fund adjust to a rise in interest rates, the fund's share price may decline. High-yield, lower-rated (junk) bonds generally have greater price swings and higher default risks than investment-grade bonds. Foreign investing, especially in emerging markets, involves additional risks, including currency fluctuations, economic instability, market volatility and political and social instability. These and other risks are described more fully in the fund's prospectus.

**Disclosure:**

*This material must be preceded or accompanied by the current prospectuses. You can receive prospectuses from your Horace Mann representative or by calling 1-800-999-1030. You should read the contract prospectus and the underlying investment option prospectuses carefully and consider the investment objectives, risks and charges and expenses carefully before you invest or send money. The prospectuses will provide complete information about Horace Mann's variable annuity contracts, Horace Mann Life Insurance Company and the underlying investment options. Horace Mann Life Insurance Company underwrites these variable annuity contracts, which are offered by Horace Mann Investors, Inc., member [FINRA](#). Horace Mann Investors, Inc. is located at #1 Horace Mann Plaza, Springfield, IL 62715. Variable annuities are subject to market volatility and involve a risk of loss, including loss of principal.*
