Information as of 12/31/2024

This fund is only available in the Personal Retirement Planner Deferred Variable Annuity.

#### Description:

The fund invests in Vanguard mutual funds using an asset allocation strategy designed for investors planning to retire and leave the workforce in or within a few years of 2050 (the target year). The fund's asset allocation will become more conservative over time. Within seven years after 2050, the fund's asset allocation should resemble that of the Target Retirement Income Fund. The underlying funds are: Vanguard Total Stock Market Index Fund, Vanguard Total Bond Market II Index Fund, Vanguard Total International Bond Index Fund, and Vanguard Total International Stock Index Fund. The fund's indirect stock holdings consist substantially of large-capitalization U.S. stocks and, to a lesser extent, mid- and small-cap U.S. stocks and international stocks. Its indirect bond holdings are a diversified mix of investment-grade taxable U.S. government, U.S. agency, and corporate bonds, as well as mortgage-backed securities, all with maturities of more than 1 year. This is a moderately aggressive investment.
