Information as of 06/30/2020

This fund is only available in the Retirement Protector Group Deferred Variable Annuity.

### Description:

The fund employs an indexing investment approach designed to track the performance of the Barclays U.S. Treasury Inflation-Protected Securities (TIPS) 0.5 Year Index. The index is a market-capitalization-weighted index that includes all inflation-protected public obligations issued by the U.S. Treasury with remaining maturities of less than five years. The fund attempts to replicate the target index by investing all, or most, of its assets in the securities that make up the index, holding each security in approximately the same proportion as its weighting in the index. This is a moderately conservative investment.
