

# American Funds Insurance Series® Washington Mutual Investors Fund<sup>SM</sup>

## American Funds Insurance Series® Washington Mutual Investors Fund<sup>SM</sup>

Information as of 12/31/2023

### Description:

The fund's objective is to produce income exceeding the average yield on U.S. stocks generally and to provide an opportunity for growth of principal consistent with sound common-stock investing.

### Distinguishing characteristics:

- The fund invests primarily in dividend-paying stocks of larger, established U.S. companies.
- The fund invests, under normal market conditions, at least 90% of its assets in equity securities.

This is a moderately aggressive investment.

Sector weighting	Percent of total holdings	Top holdings	Percent of total holdings

U.S. Equities .....	91.1%
Non-U.S. Equities .....	5.5%
Cash & Equivalents .....	3.4%

FFS-00112 (12/23)

**Beta:** 0.93 (10 year)

**Beta definition:**

Beta provides a measure of a stock or fund's volatility relative to the market. The market is often defined by a certain benchmark, index or market average. The market's beta is 1. If a stock or fund is more volatile than the market, its beta will be higher than 1. If it is less volatile, the beta will be below 1. An investment that has a beta of 1.25 is believed to be more volatile than its market benchmark. For example, if the benchmark dropped 1 percent, then an investment with a beta of 1.25 is predicted to drop 1.25 percent. Remember, investment returns and principal value will fluctuate, so the value of your account, when redeemed, may be more or less than your original cost.

**Benchmark:** S&P 500
